

KOSHA FOUNDATION

KOSHA FOUNDATION - PROFILE

- Kosha Foundation was formed as non-profit organization in 2019
- We concentrate all our efforts into **service**
- We have two nodes here-
 1. Service to the planet
 2. Service to Humanity
- Service to the planet includes our efforts towards curbing pollution, cleaning of rivers, advocating best practices for environmental welfare, tree plantation drives, promoting proper waste management initiatives, etc.
- Service to humanity efforts concentrate on running a school for educating under-privileged children and initiatives around Women Empowerment.

Service to Humanity – School for Under-privileged Children

- Currently, we run a school for the under-privileged children in Gurgaon
- Unfortunate children, who are dumped in red-light areas or other barren streets in the city are adopted into the school and are provided with education and a nutritious meal
- As we peruse through this project, we have more than 80 such children, who are benefitting from this scheme
- Once they complete their basic fundamental education, we try and place them in Government-run schools to pursue their further education

KOSHA FOUNDATION SCHOOL FOR THE UNDER-PRIVILEGED

Service to the Planet – Tree Plantation Drives, River-Cleaning, Ecological Balance

- Currently, the world is facing great peril with an abundance of Carbon Dioxide and other Greenhouse gases in the immediate atmosphere. is trapped with way too much of carbon dioxide and too little of oxygen in the atmosphere. Anthropogenic activities, like production of energy from fossil fuels, Vehicular emissions, construction, manufacturing industries, and mining, have all contributed heavily to the current reality where there are an abundance of carbon dioxide and other greenhouse gas discharges in the planet.
- Deforestation has further accentuated the problem and now the world
- Though, there are no quick fixes to reset this damage immediately, a systematic step by step approach can help us restore the balance. This is why we at Kosha, keep advocating and implementing various initiatives aimed at restoring an ecological balance, cleaning up of rivers and eliminating pollution from the planet.
- Planting trees help mitigate excess carbon releases in the environment and also helps in maintaining an ecological balance which in turn needs to conservation of species. We mobilize enthusiasts like us to drive our tree plantation drives and also run an initiative called 'You PAY, We Plant' wherein we collect funds from individuals who would find it difficult to spare time to participate in these drives.

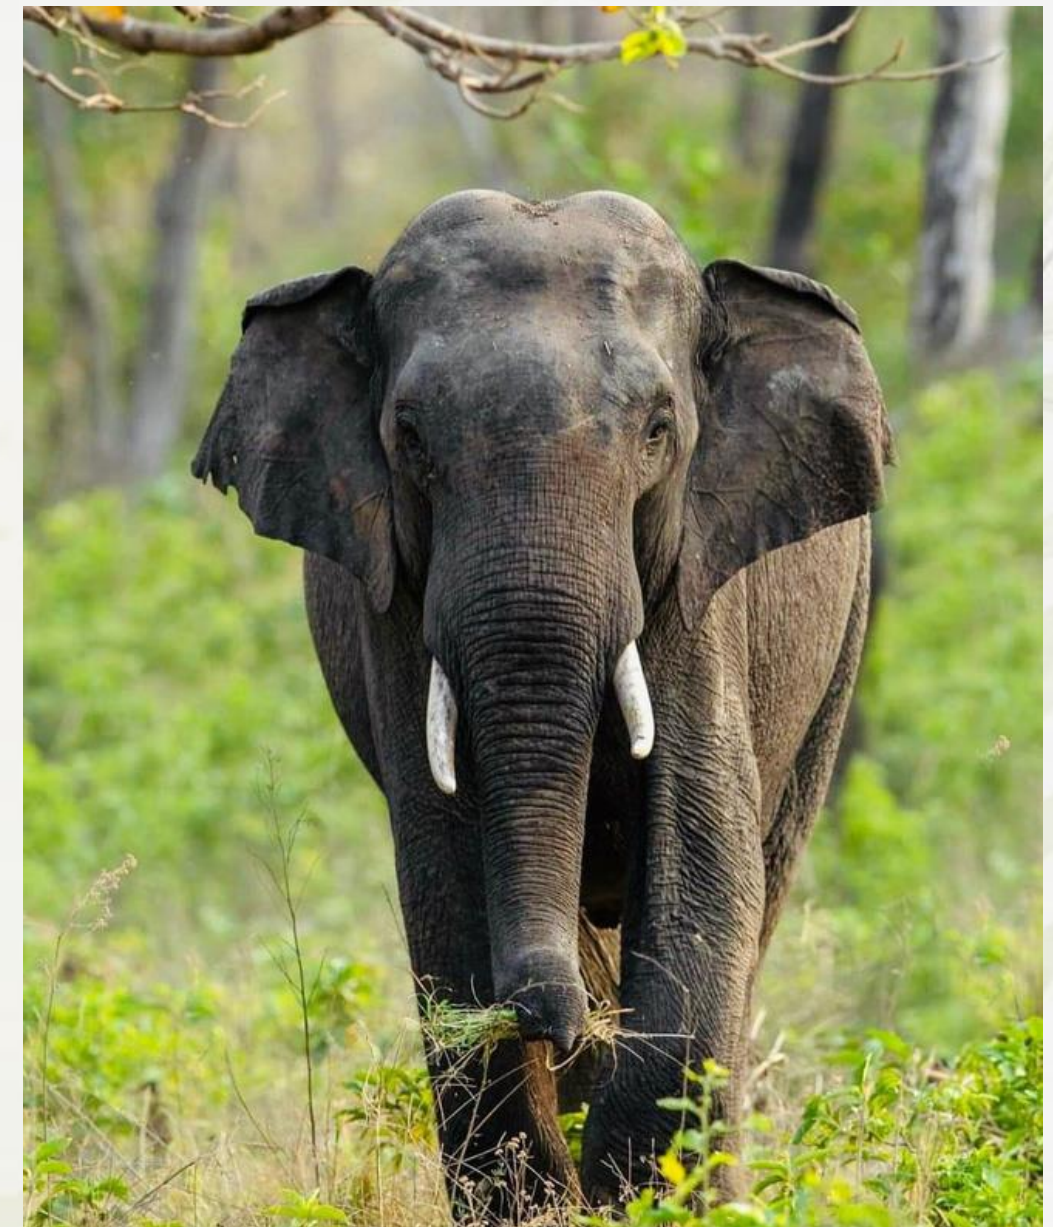

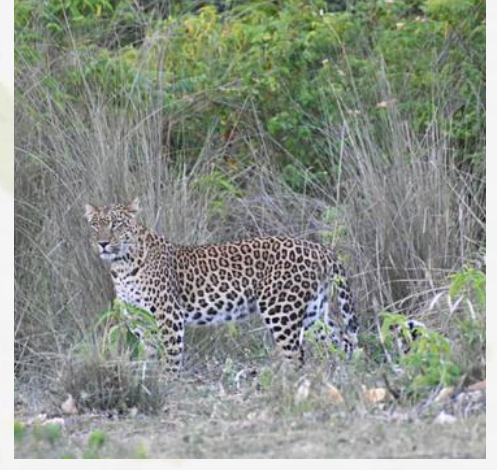

RIVER-CLEANING DRIVES

TREE PLANTATION DRIVES (FLORA)

DEVELOPED WILDLIFE (FAUNA)

"The true meaning of life is to plant trees,
under whose shade you do not expect to
sit."

— Nelson Henderson

Thank You
